2nd Leg

Station : 18

USGS 31st operation

Day: 14/07/02

GMT time: 18:03

Latitude: 28°04.00 N

Longitude: 89°43.15 W

Water depth: 664 m

Location: West Mississippi canyon

Core number: **MD02-2571C²**

Corer type: Giant box core C²

Corer length: 12 m

Core length: 10.38 m

Observations

Corer condition: Good

Core condition: Good

Sections and Sampling

Number of sections recovered and conditions:

2 sets of D-tubes were taken. They have been labelled Ia to VIIIa, and Iw to VII w

Onboard sampling and post cruise processing:

- The two D-tubes sets will be stored at Texas A&M University
- Samples were taken for pore water analysis (microbiology, and SO₄⁻, Cl⁻, CH₄, ¹⁴C, DIC) (MBARI, Univ.Tokyo)

Summary of physical and sedimentological observations

No description was made on board.
